Subject: This just in!!! Tommy Long Idiotic Response to critique regarding Sound Pressure Level (SPL).

Just in! This is a hilarious email response from **Tommy Long** [M] to Joy Hearn on 10/24/2022, confirming his status as an idiot. Evidently, this email is in response to my posting that he was beating up on two women making a public comment at the 10/17/2022 county commission meeting. See www.haywoodtp.net

[Flashback!!! Transcribed portions of 10/17/2022 County Commission Meeting - Tommy Long is an Idiot and an \[expletive deleted\] Bully. Two Public Comments and Tommy Long's Response, re: SPL \(Sound Pressure Level\). 10/17/2022. 10/24/2022...](#)

Subject: Hair dryer

Mrs. Hearn

This specific point is not worth spending a lot of time on. I understand Mr. Miller is getting some age on him, his hearing is not well and others say his math skills are diminished. It's just the place he's in right now in life. His own political party kicked him out and it's told reliably his father said he was an embarrassment to him.

I look forward to speaking with you about the community committees recommendations soon. I will include the slide I was referring to . The hair dryer is 90-100dbs. I can easily see Mr. Miller's mistake. I ran through that statement rather quickly. It's no big deal to me but he needs it to be for his sake. He desperately needs a diversion. And most importantly he needs to bleed votes off other candidates to put in his candidates column. The local news media that he copied on this is not fooled and I'm sure not easily diverted from 4.4 million dollars of public funds to a 25 dollar hair dryers sound level.

The real reason he is trying to deflect attention to the hair dryer is because he and Mr. Terry Ramey made a bold statement in front of several witnesses a few weeks ago. They claimed to have paper evidence of 6 million in county funds from a project started years ago. The record states 1.6 and some change. I and another commissioner Mr. Rogers implored them to bring their evidence to a board meeting and enter it into record. That was a couple months ago and they still have not produced. I'm still waiting and ready to call in the SBI to investigate the missing 4.4 million in public funds they claim to have evidence of if they produce it.

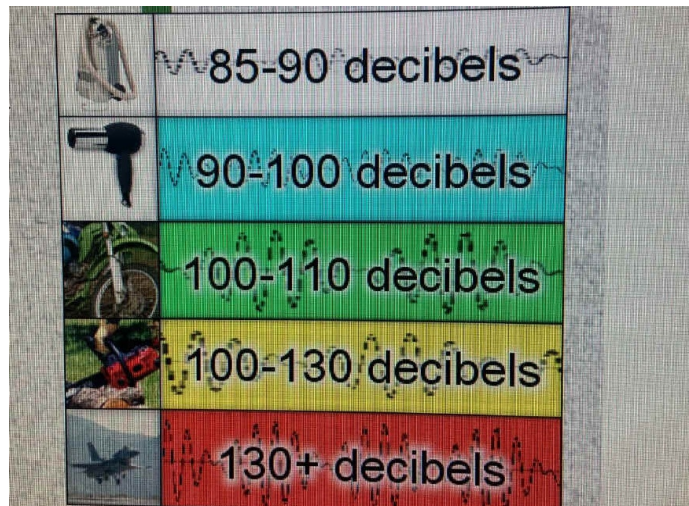

So the real issue here is Mr. Miller's 6 million dollar claim not a hair dryers decibel range. He has a personal blog online. He has no editors or fear of retribution because he can claim political satire when he spews out slanders and obscene jargon.

[**Editor's Note:** Slander is when you say something untrue about a person, Liable is when you write something about an individual. There is neither slander or liable if what is said or written is the truth.]

The commissioner board looks forward to Mr. Miller and Mr. Ramey producing the documents. Im certainly not expecting it because he has had ample time. Maybe he forgot or more likely is creating this hair diversion.

I know from our previous conversation today you were in public service for many years. I'm sure you've dealt with many people similar to Mr. Miller over the years so this is no surprise to you. I am sorry you have gotten tangled up with this election cycle drama.

By the way I'm still encouraging my wife to wear ear plugs with her new one. I think it's in the chain saw range. Lol. Anyway have a nice evening and a good chuckle over this.

Thomas A. Long
